

High Plains Raceway

Passing Zones for RMR-PCA
Driver Education Events

Passing Procedures:

- 1) Passing is to be performed only in the **Passing Zones** specified on the map above. No passing is permitted in any other area, even if the passing signal is given.
- 2) The responsibility for passing is that of the Leading vehicle, not the vehicle who wants to pass. The Leading car controls the pass with hand signals for safety.
- 3) The driver of the Leading vehicle must indicate which side the Passing vehicle must pass on with the appropriate hand signal. If the driver of the Leading vehicle withdraws their hand signal, the passing vehicle must not complete the pass.
- 4) If a **Yellow Flag** is shown at a Corner Station, no passing is permitted until the incident is passed and the next Corner Station can be seen without a **Yellow Flag**.
- 5) The driver of the vehicle being passed must also lift off the accelerator pedal while displaying the passing signal to facilitate the passing process.
